

P21313.A05

Application No. 09/920,805

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : S. SHIBAMURA et al

Appl. No. : 09/920,805

Group Art Unit : 1642

Filed : August 3, 2001

Examiner : Holleran

For : COMPOSITION FOR IMMUNOHISTOCHEMICAL STAINING

PRELIMINARY AMENDMENT

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Sir:

Applicants respectfully request entry of the following amendment with allowance of the application:

IN THE SPECIFICATION

Please amend the specification as follows, with a marked-up copy of the amendment to the specification being included in an Appendix attached to this reply:

Please replace the paragraph appearing at page 12, line 29 to page 13, line 3, with the following paragraph:

A1
In the fluorescent functional group represented by the above formula (II), R^4 and R^5 independently represent hydrogen atom, an alkyl group, an alkoxyl group, or a sulfonate group. Each of R^4 and R^5 may substitute on the phenyl group at any position. As the alkyl group and the alkoxyl group, those mentioned above may be used. The sulfonate group ($-\text{SO}_3^-\text{M}^+$, wherein M^+ represents an alkali metal ion that may be the same or different from M^+ as a counter ion for Q^-) may be, for example, sodium sulfonate group or potassium sulfonate group.
